

## **BOLTON & MENK HOSTS WATER RESOURCES SEMINAR**

Bolton & Menk, along with the Minnesota Pollution Control Agency, hosted a Water Resources seminar at the Country Inn & Suites in Mankato, Minnesota on Wednesday, March 30, 2005. The course reviewed the six minimum measures that all cities must address in submitting its Municipally Separate Storm Sewer System (MS4) permit.

Mr. Douglass, Water Resources Department Manager at Bolton & Menk, has experience in preparing the needed SWPPP and shared that experience. Guest speakers included Dale Thompson of the MPCA and Steve Albrecht, City Engineer for Prior Lake, Minnesota. The program was a successful way to educate municipalities about the requirements the MPCA has regarding the MS4 permit.
