ENVIRONMENTAL REVIEW AND DOCUMENTATION

It is critical to consider environmental impacts and review/documentation requirements at the front end of any project. Our team helps limit environmental impacts and guides you to regulatory approval, ensuring review and documentation is completed in a timely and effective manner.

BOLTON & MENK

Real People. Real Solutions.

Benefits

- Efficient preparation and approval process

- Minimize risk by our comprehensive knowledge of environmental review and process requirements, ensuring proper steps are followed

- Demonstrate experience to client/review agencies using uniform documents and procedures

- Make design adjustments to avoid environmental impact at the front end, saving time and budget for the overall project

What We Do

- Preliminary environmental screening/fatal flaw analysis prior to formal environmental documentation to inform concept feasibility and alternatives development

- National Environmental Policy Act documents and associated processes, including Categorical Exclusions, Project Memorandums, Environmental Assessments, and Environmental Impact Statements

- Minnesota Environmental Policy Act documents and associated processes, including Environmental Assessment Worksheets, Alternative Urban Area Reviews, and Environmental Impact Statements

- Program-specific environmental review and documentation such as Environmental Assessment Statements for trails with DNR grants, and Environmental Information Worksheets for stormwater/ wastewater projects with Clean Water State Revolving Fund support

- Guidance and coordination regarding regulatory compliance for wetlands, stormwater management, cultural resources, noise, and other impact categories

Why Bolton & Menk

Our experienced and dedicated staff have a broad range of capabilities, including state and federal documentation and cultural resources expertise. Our superior technical support capabilities for land use, wetlands, stormwater management, and other technical topics ensures environmental review and documentation can be provided for all project types.

We assist our clients in reviewing the potential for environmental impacts, identifying how to avoid impacts, and securing the necessary documentation and permit approvals. Because we know the issues, procedures, and have the trust of agency review staff, we can perform this work without unexpected delays or costs.
