& MENK**

Real People. Real Solutions.

HIGHER EDUCATION

Realizing Your Institutional Vision

Bolton & Menk designs and engineers campus infrastructure to harmoniously integrate nature and functionality while enhancing the overall campus experience for students, faculty, staff, and visitors. We have successfully delivered civil engineering, site circulation, traffic safety improvements, landscape architecture, placemaking, and master planning services to numerous public and private K12 schools, colleges, and universities. We are committed to creating outstanding learning environments that surpass our clients' academic objectives and enhance educational quality at all academic levels. We help our clients create a variety of ideal spaces for academic, residential, athletic/recreational, student support, and administrative uses. Our expertise in education includes campus planning, facilities plans, residence halls, student unions, dining halls, performing arts centers, classrooms/laboratories, libraries, streets, parking lots, and athletic/recreational/wellness facilities.

Your Trusted Partner for a Sustainable, Resilient Campus

We plan for your current and future needs, allowing your campus to accommodate increasingly diverse populations and evolving student needs. Our multidisciplinary team has specialized experience in pedestrian and bike trail planning, design, pricing/bidding, and construction administration, all adhering to DOT design standards and guidelines, and ADA compliance standards and regulations. We guide our educational clients through the necessary planning and stakeholder outreach to establish a common vision and achievable goals for effective projects. Additionally, we offer extensive sports field design services to accommodate educational or professional-level competition events.

Why Bolton & Menk?

We are creative problem solvers. Our team listens, collaborates, embraces challenges, and strategically applies the right tools to meet your educational needs. We pride ourselves on reflecting your institution's values, history, and culture through intentional design, fostering a sense of community and campus identity. Our southeast locations have provided landscape architecture and civil engineering services for more than 120 public and private K12, college, and university projects on more than 68 campuses across North Carolina, South Carolina, and Virginia.
