

**BOLTON
& MENK**

Real People. Real Solutions.

IRRIGATION

Fostering resilient landscape environmental systems

Our irrigation and reuse irrigation expertise offers innovative solutions to solve complex water management problems. Irrigation design encompasses an understanding of hydrology, agronomy, and engineering principles. Our irrigation expertise uses advanced technologies, such as drip irrigation, sprinkler systems, and SMART controls, to ensure precise water delivery and conservation. Our professionals are adept at implementing best management practices to promote water resource sustainability.

How We Can Help

The Bolton & Menk urban design group has experience with consulting, design irrigation, and reuse irrigation systems for a variety of municipal and private projects. These features integrate with other Bolton & Menk services such as water resources, landscape architecture, and civil design work.

Benefits

- Better looking lawn and landscape
- Less maintenance
- Maintains landscape investment
- Increased property value
- Less plant disease
- Improves landscape health

Other Irrigation Services:

- Irrigation Design
- Irrigation Renovation
- Irrigation Audit/Assessment
- Reuse Irrigation
- Irrigation Consultation
- Irrigation Master Planning
- Water Amenities & Pumping
- Irrigation As-Built Mapping
