

**BOLTON
& MENK**

Real People. Real Solutions.

TRANSIT SERVICES

Bolton & Menk specializes in providing public infrastructure solutions. With locations across the Midwest and Southeast, we have a vested interest in local transportation facilities and the access they provide to people, businesses, and destinations. We believe investment in transit systems helps build healthier communities with a stronger sense of place. We support our clients by creating and maintaining safe, accessible, reliable, sustainable, and cost-effective solutions.

Benefits

- Staff with agency expertise that provide a unique and thorough understanding of public transit agency operations
- Implementable plans for transit service, infrastructure, and engagement
- Best practices for transit planning and design
- In-house funding team to make plans a reality

We Can Help

- Develop service, operations, and transit development plans
- Public communication and community engagement
- Microtransit planning
- Transit-oriented development and market analyses
- On-call planning, scheduling, and support services
- Conceptual and final site/facility design
- Grant preparation and administration

Why Bolton & Menk

- We take projects from planning through implementation
- We know our communities, how they operate, and how transit can fit within their public infrastructure
- We include other specialty functions that enhance our transit capabilities
