CONSTRUCTION UPDATE

Generation X plans to begin curb removal along Hillcrest Drive on Wednesday, August 10th, and they will follow with sanitary sewer construction on Thursday, August 11th. They will also begin laying out the temporary water system on Hillcrest Drive this week. The temporary water system is an above ground pipe that will be connected to your home, likely through an outside faucet. This will help maintain water service to your home while the contractor installs the new utilities in the street. Contractor personnel may need to enter your home to make arrangements for the connection. Note that once the system is hooked up, you may notice warmer water than normal coming from your faucets. This is caused by the sun warming water in the pipe above ground. If you have any questions about the temporary water system, please feel free to contact Russ or Brian with Bolton & Menk, Inc.

CONTACTS

Informational newsletters, such as this one, will be mailed to you periodically throughout the project. A project website has also been set up and can be accessed here: www.bolton-menk.com, click on "Client Zone", then on "City of Rushford 2016 Street & Utility Improvement Project." You can sign up for e-mail updates on the website as well.

If you have questions or concerns at any time, please contact the City Engineer, Brian Malm at 507-381-7511, or brianma@bolton-menk.com.
