A-1 Excavating, Inc.

Bloomer, WI

Overview

The City of Lewiston is undertaking a construction project to improve the city streets and utilities along Rice Street, Benike Street, First Street, Second Street and Country Club Drive. The project includes the replacement of the existing sanitary sewer and watermain systems, bituminous surface, curb and gutter and storm sewer.

Project Timeline

A-1 Excavating is currently scheduled to begin work the week of July 16th. Traffic control devices will be installed the week of July 9th. A-1 Excavating plans to start work on Rice Street first and move onto First and Second Streets later in July. As the Rice Street construction progresses and a more definitive start on First and Second Streets is known another newsletter will be sent out.

Questions

Private Utilities

The gas, electrical, and communication companies have started their relocation work and should finish the week of July 9th. This may cause intermittent disruptions in these services. Those utility companies will be in contact with you.

Contacts

Informational newsletters, such as this one, will be mailed to you periodically throughout the project. If you have questions or concerns at any time, please contact Bryan Holtz or Adam Nix at the phone numbers or email addresses listed.

2018 Street & Utility Improvement Project

Alert

Detour and Access

During construction, access through the construction zone will be difficult and limited or restricted depending on the construction activity taking place. Local traffic should obey road closed signs and find alternate routes around the active construction zone. At the end of each day, the contractor will be required to provide temporary gravel surfacing to allow local traffic through the construction zone.

Access to driveways will be limited and intermittent during construction, depending on the construction activity taking place. At the end of each day, the contractor will be required to provide temporary gravel surfacing for driveway access. However, direct driveway access may be limited during the day when excavation and other construction activity is occurring adjacent to driveways. In addition, when concrete curb, walk, and driveways are being constructed, access to driveways will be restricted for extended periods, possibly up to 7 days.

Wet weather will also make access difficult for periods of time. If you are concerned about access during construction, or have questions, please contact Steve Vrieze at the phone number listed on the first page.

Garbage and Mail

Garbage and recycling collection will continue on its regular schedule during construction. You should set your garbage and recycling containers out as you normally would. During times when the garbage truck is unable to access the front of your property for any reason, the contractor will label and move them to an accessible location

for pickup and return them to you after collection.

Mail delivery will continue during the project. The contractor may elect to set up temporary mail boxes in a centralized location that will be accessible to the postman. You will be notified if your mailbox location will be affected.

Private Improvements in Right-of-Way

If you have improvements such as landscaping, retaining walls, shrubs, bushes, flowers, sheds, irrigation systems, etc. in the right-of-way, it is not the contractor's responsibility to work around them. The property owner is responsible for securing these private improvements and moving them if necessary to allow the project to be constructed. Neither the contractor nor City is responsible for damages incurred to private improvements in the right-of-way. Any underground improvements, such as irrigation lines and heads, dog fences, etc., should be located and marked so they are readily visible.

regarding safety must be heeded; likewise if you observe an unsafe condition please report it to the RPR immediately.

Construction Safety

Work Area

It is very common on these types of projects that area residents (especially children) become quite curious about the work the Contractor is performing. We ask that you please be respectful of and stay well clear of construction zones. Many hazards and dangers exist from heavy machinery, trenches, loose material, confined spaces, hot asphalt, etc. and often times are not recognizable by the general public. The Contractor has responsibility to ensure safety on the project and within the construction area. Any direction from the Contractor
