Zenke, Inc.
La Crescent, MN

Project Timeline

The contractor is currently scheduled to begin work, along Walnut St and the west end of Grove St, on **Tuesday May 28th**. They plan to remove pavement and curb & gutter, then begin underground utility construction. Dewatering equipment was installed on May 15th & 16th. **The dewatering pumps will be started on Friday, May 24th and continue to run (24 hours/day) until the necessary work has been completed. These pumps will create some excess noise in the project area.**

Please remember this schedule is subject to change and weather dependent.

Temporary Mailboxes

Temporary mailboxes have been installed (See map below for location). Effected residents will be informed prior to removal of existing mailboxes. A note will be placed in your existing mailbox informing you of the transition.

Private Utilities

The gas, electrical, and communication companies may start relocation work prior to Zenke starting their work. This may cause intermittent disruptions in these services. Those utility companies will be in contact with you.

Contacts

Drew Weber will be on site throughout the summer and will serve as the primary contact during construction. Drew can be reached at 507-469-0306 or drew.weber@bolton-menk.com.

Additional information about the project can be found on the project website: <https://www.bolton-menk.com/rushford2019>
