Paving Schedule Map

The asphalt will typically be installed at temperatures between 275° F and 350° F. Therefore, please have children stay away from the asphalt until it cools, which will be after it's rolled the same day.

Please do not park on a street the day it is scheduled to be paved. These dates are weather permitting and could change. There will be no parking signs posted as well. During the paving process, access will be maintained only for driveways directly accessing the streets. If you need to drive over the fresh asphalt, please keep your speed low to avoid spinning your tires and harsh turning motions.
