Hwy 30 Construction Update

Now that the Phase 1/Downtown portion of the project is open to traffic, please be advised that some minor work still remains. Crews will be on site intermittently to complete the remainder of turf and sidewalk restoration.

On the west end of the project, underground crews expect to finish utilities and storm sewer around the end of September or beginning of October. By this time, normal water and sewer service should be restored. As this underground work is completed, other crews will be following to install gravel base for the new road. In October, concrete and paving crews will be in the area to finish the remainder of streets and sidewalks.

West End Access & Parking

Please continue to access Southview Terrace and the west end of the project from Hwy 30, west of town for the next few weeks. A few short term closures of the Southview intersection still remain.

Bluffview Rd, south of the project is a public street and is available for parking. When parking here, please use the north or west sides of the road so no camping spaces are blocked. Please contact us with any special accommodation requests.

Some residents have been asking about parking/access through private properties. Please coordinate directly with your neighbors if you have any questions related to these permissions.

Garbage Pick-up

We have received several complaints about forgotten garbage/recycling pick-up in the past week. In order to make this process easier, **please set out your bins out by Monday morning and allow till Tuesday evening for bins to be returned.** If you are missing a bin, please contact Grayson at the number below.

Contacts

If there are any questions, please contact our on-site representative Grayson Gavin at 507-721-9087 or Grayson.gavin@bolton-menk.com. As questions arise during construction, he will be able to provide you with a timely response.
