Hwy 30 Construction Update

At sometime next week (and possibly before you receive this notice) street paving for both phases of the project is expected. The remainder of concrete curb, driveways and sidewalk work on phase 2 will also be underway.

As work is completed, areas of the project will gradually become more accessible to local traffic. Please be aware that the contractor will be working in the area for a few more weeks. It is likely that the roadway will not be formally open to all traffic until the beginning of November.

Front yards and boulevards will be filled with topsoil and then covered with blankets or mulch over the winter. It is likely that new grass seed will not be planted until next spring.

End of Year Concerns

If you have any major concerns with the work performed in front of your home, **it is very important that you voice your concerns as soon as possible.** Waiting until after the contractor has left the project may result in no action taken. Please call one of the contacts listed in the left margin of this letter.

Concrete Work

Below are a few reminders regarding concrete curb, driveways, and walks. Prior to any work you may notice stakes, stringlines, and forms. It is very important that these remain undisturbed. If you need assistance navigating around these devices, please contact us.

Wet concrete can sometimes be indistinguishable from dry concrete. As a best practice, **please do not walk on any concrete that you are seeing for the first time.** You may walk on concrete after 24 hours and drive after 7 days.

Garbage Pick-up

We have received several complaints about forgotten garbage/recycling pick-up in the past week. In order to make this process easier, **please set out your bins out by Monday morning and allow till Tuesday evening for bins to be returned.** If you are missing a bin, please contact Grayson at the number below.
