“What’s Under My Street?” Interactive Tool

Real People. Real Solutions.

Bolton & Menk developed the “What’s Under My Street?” interactive tool to communicate with various community stakeholders to help them better understand their infrastructure. The interactive tool helps visualize and explain the systems that exist below a neighborhood street, from sanitary and storm sewer to private utilities and the roadway itself. The tool has been customized for Minnesota communities such as the Cities of Hopkins and Lake Crystal.

To view the interactive tool, please go to:
