Phase 1 (Downtown) Construction Starts May 9

The first phase of construction for the Highway 30 project is starting on May 9th. The work will be located in the downtown area between Mill Street and Stevens Avenue. **See the attached map.**

Anticipated Impacts

During the next two weeks, businesses and residents within the work area will lose access to Jessie Street (Hwy 30) during most times. During the first few days of work, the contractor will be reaching out to building owners and/or occupants individually and connecting buildings to a temporary water supply system.

Additional details regarding construction and past newsletters can be found by accessing the project website listed below or by calling the contact listed below.

Phase 2 (Residential) Area

Properties west of the Stevens Ave/Jessie Street intersection should not be severely impacted during the month of May. Some minor work may start; however, the street will be fully open to traffic.

Contacts

If there are any questions, please contact Derek Olinger at 507-525-2685 or derek.olinger@bolton-menk.com. Once construction is started, we will provide contact information for our on-site representative. **As questions arise during construction, we ask that you contact the person listed in this letter rather than city hall.** This will allow for the quickest response time.

Project Website
